# “Investment fraud” warning

**We are currently witnessing an increased number of “investment fraud” attacks in Switzerland. How can you protect yourself against such attempts at investment fraud?**

“[Investment fraud \(https://www.ebas.ch/en/investment-fraud/\)](https://www.ebas.ch/en/investment-fraud/)” scam tactics involve attacks serving to convince victims to participate in a fake investment. To this end, fraudsters promise to achieve an (unrealistically) high yield to induce their victims to remit money.

Investments are purportedly made into objects such as gold, real estate, crypto currency and land. However, any money you part with always ends up straight in fraudsters’ pockets.

You can find out how such attacks are carried out and how you can protect yourself in our new article on “[Investment fraud \(https://www.ebas.ch/en/investment-fraud/\)](https://www.ebas.ch/en/investment-fraud/)”.
