New Cryptocurrency course

Cryptocurrencies are enjoying ever increasing popularity and you can use this currency to pay in more and more everyday situations. We are now offering a new course on this topic, too!

“eBanking – but secure!” will support you when discovering cryptocurrencies. Our new course will instruct you in the safe use of this young currency.

In the first part of the course you will learn what exactly cryptocurrencies are, how they are structured and what Blockchain technology is. The second part serves to discuss how to handle cryptocurrencies safely. This includes buying, storing, transferring and bequeathing cryptocurrencies. Last but not least, we will also discuss risks and protective measures.

If this sounds interesting, don’t hesitate to register for our **cryptocurrency course**, taking place either in **Zurich on 31st May** or in **Lucerne on 21st June** right away!

Further details on this course and the registration link can be found here (https://www.ebas.ch/en/cryptocurrency-course/)
