# EBAS Practical Courses

**We are running our practical courses this autumn again. Amongst other things, these will enable you to apply our “5 steps for your digital security” on computers running Windows 11 provided by us in a protected environment. Do apply today!**

During the first short part of our course, we will introduce the basic course contents and cover them in more detail. We will also run some computer and e-banking security demos. During the second part, you will perform some exercises for secure e-banking on (Windows 11) computers provided by us, both guided and on your own. Any concerns or questions you might have can be addressed on site straight away. You can then take the instructions with you to follow all the points discussed on your own computer back home.

If you feel this is of interest to you, please register today for one of our autumn [practical courses \(https://www.ebas.ch/en/practical-course/\)](https://www.ebas.ch/en/practical-course/) !

Further details on this course and the registration link can be found [here \(https://www.ebas.ch/en/practical-course/\)](https://www.ebas.ch/en/practical-course/) .
