Spring 2026 courses

Digital dangers are more present than ever. Take one of our popular courses to protect yourself. Next to our online courses, we will also be offering on-site courses next year again, too! They offer the know-how required to protect your data and devices and also teach you how to use your e-banking, mobile payment facilities or cryptocurrencies safely.

“eBanking – but secure!” (EBAS) regularly offers a variety of different courses. With basic courses right up to special ones, for instance dealing with mobile banking and mobile payments or cryptocurrencies, there is something for everyone. And the best thing: **on-site courses in a variety of Swiss towns** are once again part of the program next year, too!

Have a look at all our courses on offer (https://www.ebas.ch/en/course-overview/) here and register for one today!
