Free webinar: How to recognise and avoid fraud

Investment fraud is strongly on the rise, increasingly also affecting private investors.

In our **20-minute webinar** (in German language), you will find out more about the modus operandi of perpetrators, about the psychological mechanisms they employ and how typical attacks – from Social Media contacts through to alleged payouts – are structured. We will use a real case example to demonstrate to you the way such offences are executed and provide you with some specific information on how to spot warning signs early on, and how to effectively protect yourself.
