

# Certificate checking: Microsoft Edge

These instructions will explain how to check the certificate fingerprint of a website in an Microsoft Edge browser.

If you are looking for other browser instructions, you can find these [here \(#OtherBrowsers\)](#).

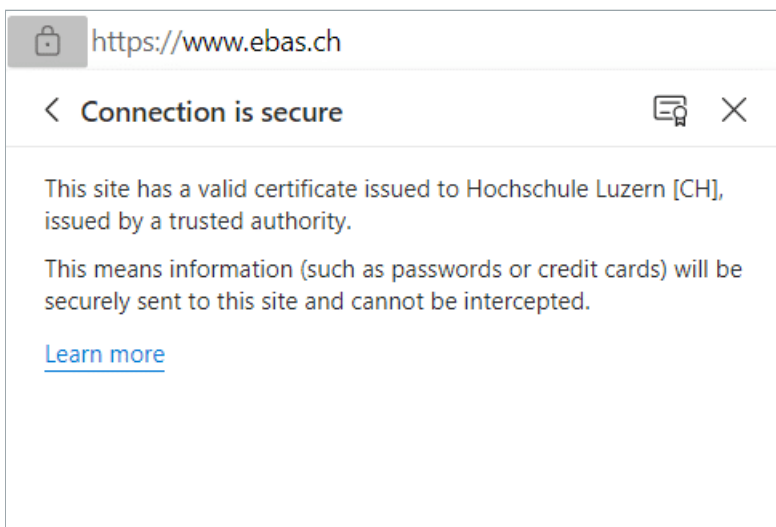

1. Click the **lock** in the address line.

2. Click **Connection is secure**.

3. Click on the **certificate symbol** left of the "X"

4. Select **Details** tab.

**Certificate Viewer: www.ebas.ch** ✕

**General** Details

---

**Issued To**

Common Name (CN)	www.ebas.ch
Organization (O)	Hochschule Luzern (HSLU)
Organizational Unit (OU)	<Not Part Of Certificate>

**Issued By**

Common Name (CN)	DigiCert EV RSA CA G2
Organization (O)	DigiCert Inc
Organizational Unit (OU)	<Not Part Of Certificate>

**Validity Period**

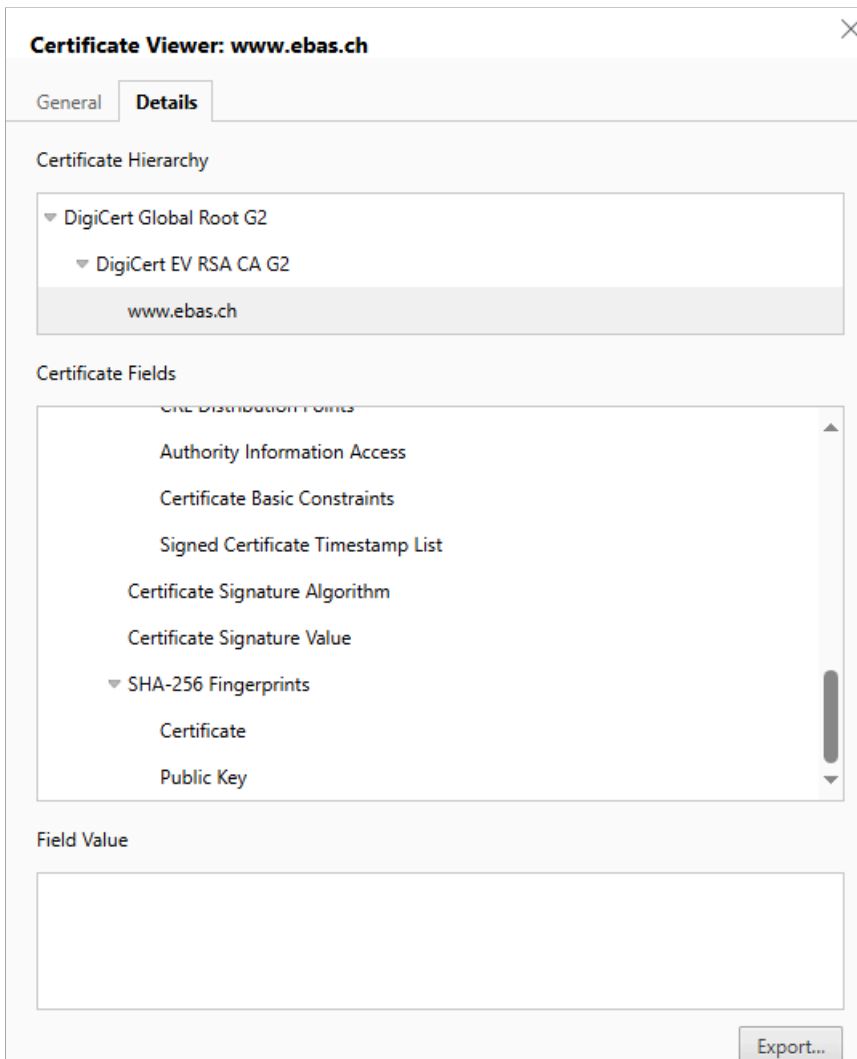

Issued On	Friday, June 28, 2024 at 2:00:00 AM
Expires On	Friday, July 11, 2025 at 1:59:59 AM

**SHA-256 Fingerprints**

Certificate	feac6b61ea47ca2aba5797d150d79b9ce8cababcdc46e0c0585cd89b4963be37
Public Key	46b4bfc40fb312078959308a758cd740780988b9418f3056bf13738b15f6ee3c

5. Scroll to the end of the window and click **Thumbprint**.

6. The fingerprint is verified comparing the character set displayed with a reference set which you will have received from your financial institution. If the character sequence read from the certificate and the reference sequence received from your financial institution are identical, this is a genuine certificate. Please note when comparing the fingerprint type: The sequence and reference sequence must be of the same type (SHA-256 or SHA1 respectively). You will find our partner banks' certificate fingerprints on our website in our article on [Certificate Checking](https://www.ebas.ch/en/checking-certificates/). (<https://www.ebas.ch/en/checking-certificates/>)

## Instructions for alternative browsers:

[Google Chrome \(https://www.ebas.ch/en/certificate-checking-chrome/\)](https://www.ebas.ch/en/certificate-checking-chrome/)

[Mozilla Firefox \(https://www.ebas.ch/en/certificate-checking-firefox/\)](https://www.ebas.ch/en/certificate-checking-firefox/)

[Apple Safari \(https://www.ebas.ch/en/certificate-checking-safari/\)](https://www.ebas.ch/en/certificate-checking-safari/)

[Android Google Chrome \(https://www.ebas.ch/zertifikatspruefung-android-google-chrome/\)](https://www.ebas.ch/zertifikatspruefung-android-google-chrome/)

*You can check the authenticity of a certificate which an TLS/SSL connection is based on with the help of the certificate fingerprint. A fingerprint is usually displayed as a hexadecimal character string consisting of the letters A-F and the numbers 0-9.*
