

Online course cryptocurrency

This online course will introduce you to the world of digital currencies. If you are a beginner, you will find out about the best-known cryptocurrencies such as Bitcoin, Ethereum and Ripple. You will also gain insights into the underlying Blockchain technology, into how to trade with cryptocurrencies and set up a wallet and what you have to be aware of with regard to security.

Course content

First part: **What are cryptocurrencies? What is their structure?**

- The basics of cryptocurrencies
- Blockchain technology
- Bitcoin implementation

Second part: **How to handle cryptocurrencies**

- Purchase, storage, transfer, bequeathing
- Risks and protective measures

After taking our course, you will be familiar with the most important cryptocurrencies and the Blockchain technology they are based on. You will know how to trade, set up a wallet and what to be aware of with regard to security.

Target groups and preconditions

People who would like to find out how digital currencies work and what to be aware of with regard to security. No previous specific knowledge is required.
