

Deleting browser history: iOS Google Chrome

These instructions will explain how to delete your stored mobile Google Chrome browser data under iOS (browser history, browser cache).

If you are looking for other browser instructions, you can find these [here \(#OtherBrowsers\)](#).

1. Tap the three dots in the bottom right-hand corner. Then tap History.
2. Then tap **Clear browsing data...**
3. Select the period of time over you wish to delete cached information using the Clear the following items from drop down menu, i.e. at least covering your e-banking session. For instance entry **Last Hour**.
4. Then select all items.
5. Then tap **Clear Browsing Data**.
6. Tap **Clear Browsing Data** again.

Alternatively, you can also surf in incognito or private mode, so that your browser doesn't store any data in the first place.

To do so, open a new incognito window by tapping the three dots in the lower right-hand corner and then choosing New incognito tab.

[Microsoft Edge \(https://www.ebas.ch/en/deleting-browser-history-edge/\)](https://www.ebas.ch/en/deleting-browser-history-edge/)

[Mozilla Firefox \(https://www.ebas.ch/en/deleting-browser-history-firefox/\)](https://www.ebas.ch/en/deleting-browser-history-firefox/)

[Apple Safari \(https://www.ebas.ch/en/deleting-browser-history-safari/\)](https://www.ebas.ch/en/deleting-browser-history-safari/)

[Android Google Chrome \(https://www.ebas.ch/en/deleting-browser-history-android-chrome/\)](https://www.ebas.ch/en/deleting-browser-history-android-chrome/)

[iOS Apple Safari \(https://www.ebas.ch/en/deleting-browser-history-ios-safari/\)](https://www.ebas.ch/en/deleting-browser-history-ios-safari/)

Browser history (also called browser cache) denotes a type of buffer memory of your browser. Browsers will store content of websites visited (e. g. images), so that they don't have to be re-downloaded every time you visit, and the site can therefore be displayed more quickly.
