

Online course mobile banking/payments

This online course focuses on how to securely handle mobile devices, i.e. smartphones and tablets. You will be introduced to mobile banking and mobile payments, find out about current threats and learn the basics of how to best protect yourself. Another subject of discussion will be the world of Internet banks.

Course content

First part: **Current threats to mobile devices**

Second part: **Basic protection for mobile devices – “5 steps for your digital security”**

Third part: **Applications and protective measures**

- Mobile banking
- Mobile payment
- Internet banks

Upon completion of the course, you will know how mobile banking and mobile payments work, and will be able to use these apps in a secure manner!

Target group and preconditions

People who would like to find out how to securely handle smartphones and tablets and how to use mobile banking and mobile payment facilities in a secure manner.

No previous specific knowledge required.
