

Online course for the under-30s

This online course will teach you how to use your everyday devices – like your smartphone – securely. Next to these basics, we will also show you what’s important to know when using social media (WhatsApp, Instagram, YouTube, Facebook, etc.), and how to securely use clouds (Dropbox, etc.). And last but not least, we have some useful tips on secure mobile banking und mobile payments.

Course content

First part: **Current threats in cyberspace**

Second part: **Basic protection, short and sweet – “5 steps for your digital security”**

Third part: **Apps you use daily**

- Social Media, clouds
- Mobile banking, mobile payments

After taking this course, you will be aware of all the critical threats in cyberspace, and know how to protect your data against them!

Target groups and preconditions

People both young and young at heart from the age of 15, who are relatively familiar with using computers, smartphones or tablets and the implementation of basic security measures (virus protection, firewall, etc.), but would like to find out what else there is to consider, or have specific questions.

No specific previous knowledge required.

Facts

Duration: 1 hour
