Practical course

Our practical course will enable you to apply our "5 steps for your digital security" on computers running Windows 11 provided by us in a protected environment. In addition, you can check your knowledge of secure e-banking rules, and much more.

Course content

First part: **Theory** (about 30 minutes)

• Recap of basic course contents

• Demos and current updates on computer and e-banking security

Second part: **Practical exercises on computers (Windows 11) provided by us**

• Applying "5 steps for your digital security"

  • Backing up your data

  • Installing and trying out antivirus software

  • Installing and trying out a password manager

  • Etc.

• Applying the rules for secure e-banking

After taking this course, our exercises and course documentation will help you provide maximum protection for your home device.

Target groups and preconditions

People who would like to apply "5 steps for your digital security" and secure e-banking rules in a protected, practical environment.
